Section 1.0

Summary of Traffic Data Collection Activities and Analysis

1.0 Summary of Traffic Data Collection Activities and Analysis

1.1 Background

The Northwest Territories highway network consists of 2200 kilometres of all-weather roads and 1300 kilometres of winter roads. The highway system also includes five vehicle ferries. A map of the highway network is provided in Figure 1. A detailed listing of the highway system classification by surface type is provided in Table 1. It is noted that, in addition to the above, there are a number of winter roads constructed by mining companies to facilitate mine resupply.

The Department of Transportation of the Government of the Northwest Territories is responsible for the operation and maintenance, and the capital rehabilitation and upgrading of the Northwest Territories highway network. To monitor traffic utilizing the highway system, the Department of Transportation operates a series of mechanical counters and conducts periodic visual counts and surveys. Information obtained from these counts is used by the Department to monitor changes in traffic flows, to classify highways, to set priorities in maintenance and capital funding, to monitor safety aspects of the highways and to optimize engineering designs. Traffic data is also used by business and the general public as needs arise.

This report presents the highway traffic data collected by the Department of Transportation on the territorial highway network from 1993 to 1998. This report includes traffic information collected on major highways, access roads and winter roads. The report also contains information on vehicle classifications and turning movements at select intersections.

1.2 Traffic Data Collection System

In 1998, the Department of Transportation collected traffic from 52 permanent and seasonal counting stations. These stations provide hourly information on traffic for the complete year, or selected portions of the year for counters located on winter roads or other seasonal access roads. These stations are positioned to capture the general flow of traffic on the highway network. Permanent counter locations are provided in Table 2 and illustrated in Figure 1.

Vehicle classification information is collected at the five highway ferries. The Marine Services Division of the Department of Transportation is responsible for collecting and processing this information. Periodically, vehicle classification information data was collected at selected locations using a GK Instruments LTD. Series 6000 two-tube axle classifier. Highway Operations was responsible for collecting and processing this information.

Special turning movement counts at select intersections and visual vehicle classification counts are also conducted as the need arises. No turning movement counts were conducted in 1997.

In 1998, the permanent traffic counters located on Highway 3 km 175 (counter ID 3-175) and Highway 3 km 240 (counter ID 3-240) were removed. These two counters will be reinstalled in 1999.

Note:

1. In 1998, counters 3-175 & 3-240 were removed. The counters will be reinstalled in 1999.

1.3 Traffic Data Processing Procedures

The permanent traffic counters located throughout the Northwest Territories highway network collect traffic on a continuous basis. This data is stored on a recording device (module) every hour. Approximately once per month personnel working out of the highway maintenance camps replace the data modules, retrieving the module with the prior months traffic and replacing it with another.

The retrieved module is then sent to Hay River where personnel with the Highways and Engineering Division download the data from the module to disk (ASCII format) and conduct a first level screening of the data. Any problems are noted in a summary report and corrupt data is disregarded. The disks and summary report are then sent to the Transportation Planning Division in Yellowknife where the data is uploaded into a Microsoft Excel database and analyzed to obtain the information presented in this report.

The first step in the analysis of the traffic data is to check for completeness and accuracy in the data. Common problems include missing data due to the counter or module not functioning correctly, overlapping or missing data between months, and counts too high or low due to counter malfunctions. To ensure accurate results and yet provide as much information as possible, a series of procedures has been established to correct deficiencies in the data. These steps are outlined below. Estimated data is noted as such.

- If less than one week of data is missing, an average of the hourly count in the week prior and the week following is calculated and applied to the missing data.

- If over one week of data is missing but less than a month, the first step is to obtain the data from the previous year. If the data cannot be found, an average of the first prior week and the first following week is calculated and applied to the missing data.

- If over one month of data is missing, data from the previous year is applied to the missing data, if available. If this data is not available then the data is left blank.

- If greater than 50% of the original data is missing, the counter is considered to have insufficient data to estimate the average annual daily traffic.

- In the "Input Data" tables provided in Appendix A only 1998 data is shown; if there is at least one day of every weekday present in a month, then the month's weekday volumes are presented. If not available the data is left blank. In the "Summary Data" tables, data from previous years is added if available and required.

- For counters located on access roads and winter roads no extra information is introduced. Only the data collected in the current year is presented.

1.4 Glossary of Terms

Average Annual Daily Traffic (AADT) is an estimate of the mean daily traffic for a period of one year.

Average Daily Traffic (ADT) is an estimate of the mean traffic for a specified period of time. For example, monthly ADT is an estimate of the mean daily traffic for a specified month.

Near Urban Highway is a section of highway located within or near a major urban centre.

Peak Summer Average Daily Traffic (PSADT) is an estimate of the mean daily traffic for the months of June, July and August.

Permanent Traffic Counter is a counter that is permanently placed at a specific location and counts traffic continuously.

Rural Highway is a section of highway located away from the traffic influence of a major urban centre.

Short Term Counts provide measurements of traffic characteristics based on visual observation for a specified period of time and purpose.

Traffic distributions illustrate how traffic varies over time. Distributions may be by month, by day of the week or hourly, and is usually measured as a percent of the AADT.

Vehicle Classification is the distribution of vehicle types in a traffic stream.

Vehicle Kilometres Travelled is the total number of vehicles for a specific road segment multiplied by the length of the road segment.

1.5 Layout of the Report

This report is organized into four sections.

The first section provides an introduction to the Northwest Territories traffic data collection system.

The second section presents the traffic information collected at all permanent counter locations, including traffic volumes, distributions and vehicle kilometres travelled.

The third section presents traffic information collected on highway ferries, vehicle classification data from short-term counts, selected mining roads, and commercial vehicles from the Enterprise Weigh Scale.

The fourth section presents the results of the short term counts. This consists of turning movement studies conducted at four intersections, and short term traffic classification at four locations.

Additional detailed traffic information is presented in the appendices.

Note: ** Insufficient data to calculate AADT/PSADT
AADT - Average Annual Daily Traffic
PSADT - Peak Summer Average Daily Traffic (June, July, August)
All values are rounded to the nearest 10.

Table 16 Truck Traffic on Selected Winter Mining Roads

Winter Road	1999		1998		1997		1996		1995	
	Total Tonnage	Total Number of Trucks	Total Tonnage	Total Number of Trucks	Total Tonnage	Total Number of Trucks	Total Tonnage	Total Number of Trucks	Total Tonnage	Total Number of Trucks
Lupin Mine (1)	3,356	85	4,220	112	42,399	1,093	38,301	1,062	41,545	1,288
Others on Lupin (Echo Bay) Road		1,759		2,431		2,419	25,238	934	12,757	399
BHP Diamonds Ekati Mine	41,453		73,712		48,573					
Mineral Exploration Traffic	12,399		4,056		8,789					
Total Lupin Road	57,208	1,844	81,988	2,543	99,761	3,512	63,539	1,996	54,302	1,687
Total Colomac Mine (2)	-	-	-	-	42,500	1,266	55,000	1,700	47,000	1,500

The number of trucks indicated are "loaded truckloads" and therefore represents one-way traffic.
To determine the total truck traffic these numbers should be multiplied by 2.

(1) Lupin data provided by Echo Bay Mines Ltd. Road is typically open during most of January to March.

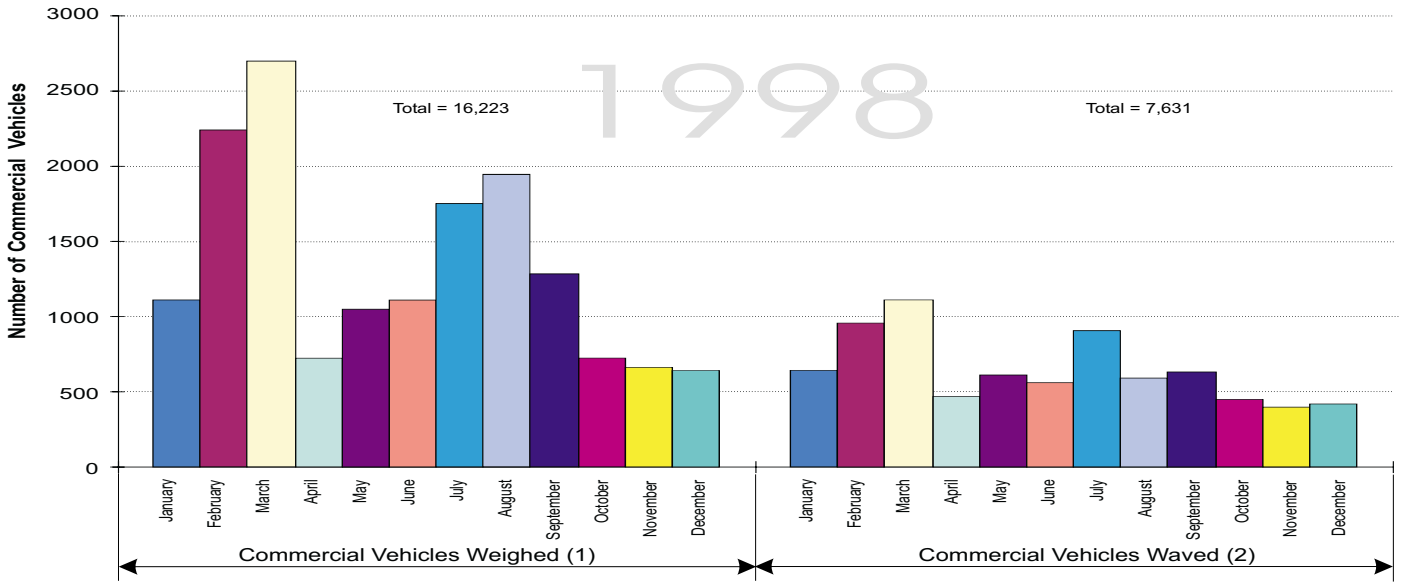
1999 season	58 days
1998 season	72 days
1997 season	75 days
1996 season	64 days
1995 season	65 days
1994 season	76 days

Notes: BHP Diamond Mines Ekati Mine went into production in October of 1998.

(2) 1997 was the last season for the Colomac winter road

Refer to Figure 1 for the location of these two winter roads.

Figure 9
Commercial Vehicles Weighed/Waved at the Enterprise Weigh Scale



Total Vehicles Weighed

Year	January	February	March	April	May	June	July	August	September	October	November	December

1996	879	1,319	898	532	471	690	584	535	629	606	552	628
1995	998	1,677	1,825	684	672	789	878	736	737	627	531	621

Note:
(1) A commercial vehicle is any vehicle with a GVW over 4500 kg.
(2) A commercial vehicle is waved if it is not carrying a load. This number is an estimate.
(3) Overweight and Overdimension permits are issued for a single trip.
(4) All commercial vehicles in the Northwest Territories must register at the scale. This registration is valid for one month with territorial plates and three months with out-of-territory plates.
(5) Fuel Tax Permits are issued to all carriers transporting bulk fuel purchased outside the Northwest Territories
